## Career Summary

---

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning. Knowledge of Data Structures, Algorithms, Deep Learning, and Natural Language Processing. Experience in developing NLP-based applications using Seq2Seq models and attention mechanisms. Familiar with data preprocessing, model training, evaluation, and optimization. Interested in applying machine learning techniques to solve practical problems.

## Technical Skills

---

- **Programming Languages** – Python, Java, C, SQL
- **Frameworks & Libraries** – TensorFlow, Keras, Scikit-learn, NLTK
- **Developer Tools** – Git, GitHub, VS Code, Jupyter Notebook
- **Core Concepts** – Data Structures & Algorithms, DBMS, Machine Learning, Artificial Intelligence
- **Areas of Interest** – Machine Learning, Deep Learning, Natural Language Processing

## Education

---

**Bachelor of Technology in Computer Science & Engineering (AIML)** 2023 – 2027  
Siksha 'O' Anusandhan University (ITER), Bhubaneswar  
CGPA: 8.73 (till 6th Semester)

**Higher Secondary Education** 2022  
Salepur Higher Secondary School, Salepur  
Percentage: 84.16%

**Secondary Education** 2020  
Saraswati Shishu Vidya Mandir, Salepur  
Percentage: 87.6%

## Projects

---

**Abstractive News Summarization using Seq2Seq Model with Attention Mechanism** March 2026

- Developed an abstractive text summarization system using deep learning techniques for generating meaningful summaries from news articles.
- Implemented a Seq2Seq LSTM model with Luong Attention mechanism to improve contextual understanding and sequence generation.
- Performed data preprocessing including tokenization, padding, and text normalization for efficient model training.
- Trained and optimized the model using TensorFlow and Keras ensuring smooth convergence and reduced overfitting.
- Evaluated model performance using ROUGE metrics for summarization accuracy and quality.
- Generated concise, coherent, and context-aware summaries outperforming traditional extractive methods.

## JDBC Library Loan Management System

May 2026

- Developed a console-based Library Loan Management System using Java, JDBC, and Apache Derby database.
- Implemented transaction management features including commit, rollback, savepoints, and ACID-compliant operations.
- Designed normalized database schemas for Members, Books, and Loans using primary keys, foreign keys, and indexing techniques.
- Conducted JDBC performance benchmarking using `PreparedStatement`, `executeBatch()`, and execution-time analysis with automated CSV report generation.

## Achievements

---

- **Smart India Hackathon (SIH) – Participant**

Sept 2025

Topic: AI Powered Yield Prediction

## Extracurricular Activities

---

- Creative Writing
- Fitness
- Photography & Editing

## Soft Skills

---

- Rapport Building
- Team Collaboration
